CONTENTS

Onset of convection in a porous mantle ..... *G K Pradhan and B Patra* 1

Vertical vibration of a circular stamp on an elastic-porous half-space with saturation fluid ..... *M Nassar* 27

Rayleigh wave scattering by a plane strip in a deep ocean ..... *K K Mann and P S Deshwal* 35

Sur le rang de la jacobienne des systèmes linéaires de quadriques ..... *Lando Degoli* 49

Aligned magnetic effects through varying permeable bed ..... *K Jagadeeswara Pillai, S Vijaya Kumar Varma and M Syam Babu* 61

On shock dynamics ..... *G B Whitham* 71

Nonlinear random equations involving completely closed operators ..... *Mohan Joshi* 75

Melting of a long cylinder due to an axisymmetric hot spot ..... *S C Gupta* 87

Rheology of polarizable non-piezoelectromagnetic material in relativity ..... *M A Shah and B B Waghmode* 103

Some generating functions of Gegenbauer polynomials ..... *Bandana Ghosh* 119

Unified theorems involving *H*-function transform and Meijer Bessel function transform ..... *K C Gupta and S M Agrawal* 125

On focal locus of submanifolds of naturally reductive compact Riemannian homogeneous spaces ..... *Hukum Singh* 131
